Subject: RE: Licensing Act 2003: Application for the grant of a Premises Licence - Story, 2 Grosvenor House, Greyfriars Road, Cardiff

In regard to the above application to grant premises license, I wish to advise that the Licensing Authority of Cardiff Council will be objecting to the application.

A Cumulative impact Policy has been adopted for the City Centre area of Cardiff. The Licensing Authority has adopted the policy due to high levels of alcohol related crime and disorder, in the interests of public safety and the avoidance of nuisance.

The policy creates a presumption that new applications for Premises Licences will be refused unless the applicant can demonstrate the business will have no negative effect on any of the licensing objectives.

The premises detailed above falls within the boundary of the Cumulative Impact Zone and therefore an objection is submitted in respect to the following Licensing Objectives.

The prevention of crime and disorder.
The prevention of public nuisance.

Consequently the Licensing Sub-Committee will need consider this application in line with Cardiff Councils Cumulative Impact Policy.

You will need to demonstrate to the Licensing Sub-Committee that there will be no negative cumulative impact on one or more of the licensing objectives if the Premises Licence were to be granted.

Kind regards

Rhys Morgan

Dear Miss Hartrey

In accordance with the Health Board's role as a responsible authority I can confirm we have received the following application for a premises license for: Story, 2 Grosvenor House, Greyfriars Road, Cardiff.

We understand that this premise will amalgamate two current premises to become one larger venue. The proposed premise is situated within the agreed Cumulative Impact Policy area of Cardiff City Centre.

The proposed larger venue will increase the capacity (ground floor changing from restaurant and bar to vertical drinking establishment) and the entire venue will have a finish time of 04:00. The proposed opening hours and increased capacity will likely contribute to higher levels of alcohol consumption.

Research has also shown that a higher density of on-trade outlets is associated with higher hospital admissions for conditions wholly attributable to alcohol¹. This application for an amalgamation will increase the availability of alcohol within this area of Cardiff, and we anticipate it will contribute to a maintenance or likely increase in the number of incidents occurring within the Cumulative Impact Policy area, resulting in a further increase in activity/data reported at the Emergency Department and Alcohol Treatment Centre as a result. In 2017, 22 attendances were recorded at the Alcohol Treatment Centre or Emergency Department, where attendees reported their last drink was at the at one of these previously licensed venues (Last Drink data). All except one attendances took place after midnight.

The Health Board does not object to the granting of the license, however we would like to see conditions on the license to ensure the safety of patrons at all times. Under the Public Safety license objective, we therefore request the following conditions to be applied to the license to minimise the possible harm to patrons:

- All staff, including bar staff to be responsible for identifying and monitoring sales to intoxicated patrons (current application only states security, welfare and glass collectors)
- Only one bottle delivered to the customers at a time via the pre-booked alcoholic beverages facility
- Dedicated staff employed to supervise no more than 2 booths or one VIP area at a time, with a responsibility to monitor the intoxication of all patrons in the booths

In Cardiff and Vale...

- Cardiff and Vale has higher levels of alcohol misuse than Wales in general.
- 46% of adults report drinking alcohol above the recommended alcohol limits on at least one day in the previous week¹.
- Men drink above the guidelines more often than women, with the 45-54 year olds drinking over the guidelines most².
- 28% of adults in Cardiff and the Vale report that they binge drink¹.
- Binge drinking in Cardiff and Vale is on or above the national average, and is likely to be centred on hotspots such as Cardiff City Centre.
- Alcohol related hospital admissions in Cardiff and Vale, for males and females, are slightly lower than the Wales average³, but this trend is rising.
- Alcohol related violent crime is lower in the Vale of Glamorgan than across all-Wales average but, this may be due to under reporting of these crimes.
- Crime in Cardiff is above the national average and while the residences of the offenders are unknown (many may be from other areas) the impact on Cardiff's services is considerable.

Why does licensing matter?

- Opening hours and density of alcohol sales outlets influence alcohol consumption, drinking patterns and damage due to alcohol⁴.
- It has been concluded that restricting the availability of alcohol is an effective way of reducing alcohol related harm.
- The number of alcohol outlets is strongly related to alcohol related hospital admissions⁵.
- There is a significant link between the density of 'pubs and clubs' and numbers of assaults⁶ and also to crime rates in general⁷
- Reducing alcohol availability and access is key to preventing alcohol related problems in the community⁸.
- Extensions to opening hours are most often used by problem drinkers to increase their access to alcohol⁹.
- Increasing the density of alcohol outlets increases competition, usually leading to lower prices and increased alcohol consumption¹⁰.
- Marginalised drinkers are most affected by changes in alcohol availability¹⁴.
- A higher density of on-trade outlets is associated with higher hospital admissions for conditions wholly attributable to alcohol¹⁵.
