matrix TELEMATICS

MTC33 Dual

Front and Rear Facing Camera

Add HD Video Evidence to crash/incident reports

Enhance driver behviour reports with in-car real-time video analysis

KEY FEATURES:

- Incident video configuration
- 20 second video file for each incident
- Video uploaded to secure, encrypted server
- Videos retained in local storage – no SD required
- Incident data information timestamped at source
- Doesn't require any user interaction
- Over-the-air application updates
- Remote diagnostics and continuous monitoring
- Link to the video will be included
- On-demand video downloads from up to 40 hours driving memory
- Discreet Hardware Installation
- Tamper alerts when running
- Infrared camera option to record car interiors at night
- Preapproved by many UK councils and authorities

No longer do you have to rely on simple packets of data to view crash incidents and dangerous driving antics.
Matrix have brought to life the next generation of telematics, meaning that you can actually watch an incident unfold in front of your eyes, minutes after it happened.

INSTANT ALERTS
Receive automated video footage and a detailed FNOL report by email upon event trigger. Avoid timely and often impractical SD card retrieval from other camera systems, instead giving you incident evidence as it happens.

INSURANCE REDUCTION
Video evidence supports non-fault road traffic incidents and expedites claim settlements, leading to future savings on premiums that can run into hundreds of pounds per vehicle.

DRIVER TRAINING
Receive automated video footage and a detailed FNOL report by email upon event trigger. Avoid timely and often impractical SD card retrieval from other camera systems, instead giving you incident evidence as it happens.

ON DEMAND
Download driving footage remotely from your desktop and analyse more of your fleet activity, following up on recent non-incident related events.

TECHNICAL SPECIFICATION
- High Definition quality video at 720p and up to 30fps
- Wide angle 120° field of view
- H.264 format
- Camera on/off controlled by ignition state or program
- Telematics camera devices in constant communication via Serial interface
- Supports MT2630
- Camera weight 50g (excluding mount)
- Camera dimensions 60 x 40 x 30mm (excluding mount)
- Cable harness needs to be wired to vehicle power, ignition and ground
- Camera tested to work up to 70°c
