

## **COUNCIL 28 JANUARY 2016**

### **AMENDMENT 2 TO MOTION 1**

After The Council therefore resolves to request the Cabinet to:

Deletion of Points 1 and 2 and replace with

- (i) Take all necessary steps to ensure the Welsh Government recycling targets are met, currently 58%, but increasing to 70% by 2025.
- (ii) Ensure the council provides 2 quality HWRCs and facilitates alternative recycling provision with the third sector such as reuse centre(s), pop up shops or mobile units, for residents in other parts of the city.
- (iii) Continue to provide recycling education, enforcement and help to residents.
- (iv) Increase future recycling by working with neighbouring authorities to explore ways of finding outlets for materials currently not recycled.
- (v) Look to develop further partnerships with Councils and companies to support high recycling, such as the one with the Vale of Glamorgan and Kelda Organic Energy Limited which will provide 98% recycling and energy from food waste in 2017 from our respective Counties.

Proposed by: Councillor Bob Derbyshire

Seconded by: Councillor Michael Michael

The Amended Motion will then read:

The Council note the challenges faced by Cardiff in terms of recycling.

The Council therefore resolves to request the Cabinet to:

- (i) Take all necessary steps to ensure the Welsh Government recycling targets are met, currently 58%, but increasing to 70% by 2025.
- (ii) Ensure the Council provides 2 quality HWRCs and facilitates alternative recycling provision with the third sector such as reuse centre(s), pop up shops or mobile units, for residents in other parts of the city.
- (iii) Continue to provide recycling education, enforcement and help to residents.
- (iv) Increase future recycling by working with neighbouring authorities to explore ways of finding outlets for materials currently not recycled.
- (v) Look to develop further partnerships with Councils and companies to support high recycling, such as the one with the Vale of Glamorgan and Kelda

Organic Energy Limited which will provide 98% recycling and energy from food waste in 2017 from our respective Counties.
