PUBLIC QUESTION FROM JOEL WILLIAMS

Councillor Patel, as the Cabinet Member for Transport, Planning and Sustainability the recent passing of the Local Development Plan demonstrates the following:

The absence of a green belt therefore risks the future development of many more greenfield sites than already outlined in the local development plan.

With the lack of roads and infrastructure in place, the development of 40,000 dwellings throughout our City will lead to grid lock and our traffic lights staying red for longer.

And finally parking in my area (Pontprennau and Old St Mellons) is already at a severe, congested, anti-social level with local residents often facing lengthy delays to navigate their way out of their own homes and onto main roads. A recent petition was submitted by myself and my colleague Cllr Dianne Rees to which you have done nothing to help the chronic, worsening problem. The development of over 6,000 dwellings in total either side of Pontprennau will only make this problem worse.

Therefore surely a revised plan - protecting green field sites and putting the views of local residents first and sorting out the awful parking problems is the right approach for our City?
