This is in addition to a reduction in caseload of HB claims as Universal Credit roll out continues. The Benefit Assessment service has a current gross staffing budget of £3.215 million.	120	0	0	120	120	0	This savings target was achieved in full following a restructure which saw the deletion of four vacant posts.

It is proposed to remove from the SLA, funded activities in relation to a community engagement work-stream, following a review of activities undertaken in recent years which concluded that insourcing these activities through the new Cohesion and Community Engagement Team would enhance efficiency and effectiveness in this area. With the new Local Government Bill proposing that all local authorities produce statutory Public Participation Strategies this will be a continued area of focus for the authority, particularly engaging with disconnected and deprived communities. It is therefore proposed to remove the grant funding (£45,690) for community engagement activities from the SLA in 2020/21, with £25,690 reinvested to support the work of the Cohesion and Community Engagement team, realising a saving of £20,000. Social Services	E34	Support practice in mental health services across adult and children's services in understanding organisational responsibilities in respect of section 117 and children's CHC Current practices for obtaining CHC funding for adults will be expanded in order to seek additional Health funding towards care packages for children. Given the size of children's care packages (c£210k for a residential placement) additional CHC contributions in just a small number of cases would be sufficient to achieve the saving. In Adults, the review of contracts was concentrated on the recovery of services post-COVID 19 and therefore the saving was not achieved.

	E37	Highways - Reshaping of Maintenance Operations A review of demand for highways related work has identified the opportunity to grant voluntary redundancy requests. A reduction in the need for reactive works, along with improvements in technologies and ways of working, supports a reduction in resources within Highways Operations, with no detrimental effect on service provision. 	E43	Street Lighting - use of Central Management System (CMS) to reduce Energy costs on Strategic routes Use of CMS to further reduce energy costs on Strategic Routes through the introduction of a dimming regime during periods of very low traffic flow. 	INC4	New Attraction at Cardiff Castle (Black Tower Tales) Black Tower Tales is a new interactive visitor attraction at Cardiff Castle, which will result in additional income from ticket sales. The attraction will serve a dual purpose as both an educational and entertaining addition to the Castle's core offering. This will increase the attractiveness of the facility to local schools, education establishments and community groups and to the established tourist market both nationally and internationally. The current income target for the Castle is £4.236 million.	0	0	190	190	0	190	The proposed Black Tower Tales new attraction to generate additional income was delayed in its implementation, due to the COVID-19 pandemic. A project is being established to see if more agency staff can be provided in house and thereby retain the agency fee income. This is at an early stage and may require the establishment of an arms-length company to increase flexibility. A report will be made to Cabinet in quarter one 2020/21 in respect of this element of the saving, with the new model expected to be implemented in quarter three. For 2020/21, £50,000 is anticipated from the new model, with an additional £100,000 from revising the internal charge from 0.2% to 2%. Social Service	INC12	Increase in maximum weekly charge for Domiciliary Care in line with Welsh Government (WG) policy It is proposed that the Council increases its maximum weekly charge from £90 to £100 per week in 2020/21 to mirror WG policy. This will increase the level of income the Council receives in service user contributions. The current income budget for charges for domiciliary care is £3.555 million.	0	0	255	255	200	55	Whilst there was a level of decline in Domiciliary Care income, the price increase was achievable on the element of retained income.

Service Change Savings									
Social Services	S1	Strength Based Practice and Commissioning Saving - Children Services Implementation of priorities contained in the children's services strategy to ensure the right range of cost effective services are in place, including development of community support to keep families together, a reunification framework, continued development of in-house fostering, reframing the relationship with IFAs and developing purposeful homes for children closer to Cardiff. Specifically, it is anticipated that the Directorate will successfully recruit an additional 15 internal foster carers (25 currently being assessed) leading to an equivalent reduction in the number of externally commissioned foster placements, producing a net saving of c£300,000. In addition, it is anticipated that, through the implementation of a range of initiatives, there will be reduced reliance on high cost residential placements. It is assumed that there will a net reduction of 3-4 placements, with an implied saving of c£600,000. The current budget for externally commissioned placements for children is £27.834 million.	0	900	0	900	0	900	Commissioning posts were implemented during the year, but could not be directly linked to savings in-year. The relevant processes and governance are currently under review but the levels of children's residential placements resulted in increasing expenditure. The Assessment Centre and other relevant initiatives are due to commence in full during 2021/22.
	S2	Closer to Home Support - Return 5 people in year to lower cost provision from out of county residential care placements Via an ongoing process of review, the aim is to return care users to lower cost forms of provision from out of county residential care placements or to step down individuals from other high cost placements. The proposed saving represents the equivalent of stepping down 5 individuals from a learning disability residential placement (average cost c£87,000 pa) to a medium cost supported living placement (average cost £57,000). There are currently 119 residential/nursing placements in learning disabilities. In terms of capacity, the existing supported living contract contains places for c300 care users with a degree of turnover evident each year. Work is ongoing with Communities to identify further accommodation. The availability of supported living places is constantly monitored and opportunities for step down considered on an ongoing basis. The current budget for care homes for adults with learning disabilities is £10.389 million.	0	150	0	150	0	150	Due to COVID-19 it was not practical to move residents from one form of provision to another and as a result savings were unachievable.
	S3	Provide more step down to general purpose accommodation for mental health users Via an ongoing process of review, the aim is to step down care users to general purpose accommodation. The proposed saving represents the equivalent of 3 residential mental health placements (average cost £37,000). If stepping down to a domiciliary care supported package (average £25k) then the equivalent of 12 individuals would have to step down to achieve the saving. There are currently 84 residential/nursing placements in mental health. The current budget for care homes for adults with mental health needs is £3.008 million.	0	150	0	150	100	50	Step-down provision was available from the end of July and therefore savings were achievable during the later part of the year.
	S4	High Cost Case review in Older people and Physical Disability cases The implementation of a strength-based panel in 2019/20 has increased the scrutiny and review of high cost placements. The panel examines opportunities to encourage independence and reduce reliance on traditional forms of care. The proposed saving of £250,000 represents the equivalent of 15,156 hours of care, which represents c1.25% of the total annual number of domiciliary care hours delivered to older people. The ongoing review includes right-sizing and examining opportunities for the use of community equipment where appropriate. The current combined budgets for commissioned domiciliary care, care homes and direct payments for older people and adults with physical disabilities amount to £51.854 million.	0	250	0	250	0	250	The focus during the year was on the response to the pandemic with little opportunity for scrutiny of high cost placements. Therefore, this saving was not achieved.
	S5	Review packages for joint funding opportunities in Older People and Physical Disability There is an established CHC review process to examine the potential for the joint (Health) funding of packages in learning disabilities. This has realised c£200k in additional Health funding in 2019/20. Recent data from external consultants suggests that further levels of joint health funding should be available in relation to learning disabilities. Learning disability placements are high cost (c£90,000) and where joint funding is agreed, the UHB contribution is typically 50%. To achieve the saving, 6-7 additional packages would need to be approved for CHC. It is intended that CHC processes in relation to older people and physical disability cases are enhanced with additional capacity being identified. The current income budget for contributions from the Health Service towards the cost of jointly funded packages is £3.7 million.	0	275	0	275	0	275	The mechanisms for reviewing funding arrangements were suspended or restricted in 2020/21, due to the pandemic, and, therefore, this savings target was not achieved.

Social Services	S6	<p>Double to single handed care review</p> <p>There is an ongoing review process seeking opportunities to reduce double handed domiciliary care visits to single carer calls. Via OT reviews, savings of c£125,000 have been identified in 2019/20 to date. Use is made of existing community equipment budgets where appropriate. The proposed saving represents approximately 6,050 hours of care, which represents 0.5% of the total care hours delivered to older people in a year. There are currently 300 care users receiving double handed care. The current budget for older people's commissioned domiciliary care is £16.04 million.</p>	0	100	0	100	0	100	Assessment and review was not possible during the year and, therefore, the savings target was not achievable.
	S7	<p>Community Resource Team</p> <p>The community resource team provides a re-ablement service which in many cases leads to a reduction in the level of care required by vulnerable people, typically after discharge from hospital. It has been identified that c900 care users have not benefitted from reablement. The intention is therefore to increase the number of people reabled, with a recent trial study identifying that there were further opportunities in this area. The proposed saving represents the equivalent of 7,600 hours of care or 0.6% of the total hours delivered to older people in a year. A 50% care reduction to a typical package size would produce a saving of c£12,000 per individual. The current budget for older people's commissioned domiciliary care is £16.04 million.</p>	0	125	0	125	0	125	The saving was around reabling people, especially on discharge from hospital, ultimately resulting in lower commissioned packages of Domiciliary Care. However, the pandemic placed hospital discharge mechanisms under pressure, therefore hindering the ability to deliver savings.
	S8	<p>Implement Review of Reablement</p> <p>A significant element of the growth in the number of care hours delivered (and hence costs) relates to incremental increase in existing care packages. The strength based group is undertaking an ongoing and more stringent review of requests for increases to packages suggesting, alternatives where appropriate. The proposed saving represents the equivalent of 7600 hours of care or 0.6% of the total hours delivered. The current budget for older people's commissioned domiciliary care is £16.04 million.</p>	0	125	0	125	0	125	Planned savings were predicated on a process of challenge on the level of domiciliary care packages provided. There was an initial drop off in the number of domiciliary care hours provide due to COVID-19. However, during this period, in order to support the care sector, providers were paid their "usual actual" hours. By the autumn provision had reduced to pre-pandemic levels and the saving was unachieved.
	S9	<p>Use of technology in the provision of care and support packages.</p> <p>Explore opportunities for the use of technology in the provision of care and support packages. Some technological applications, such as telecare, are already being utilised to support care provision. Further opportunities are being explored with a focus on preventative services that could reduce the reliance on commissioned care, the aim being to mainstream the use of technology in care provision. The current combined budgets for commissioned domiciliary care, care homes and direct payments for older people and adults with physical disabilities amount to £51.854 million.</p>	0	100	0	100	0	100	There was a lack of capacity to progress due to the pandemic and the saving was not achieved.
