

COUNCIL:

21 JULY 2022

ITEM 7: STRONGER, FAIRER, GREENER – AMENDMENT 2

Proposer - Cllr Rhys Taylor

Seconder - Cllr Rodney Berman

Delete all after “Council” and replace with:

“refers back the ‘Stronger, Fairer, Greener’ policy statement to Cabinet and calls for it to be amended in order to include additional proposals that will:

- Commit to delivering a significantly increased number of public electric vehicle charging points across the city
- Ensure the 15-minute city concept is embedded across the council’s transport and economic development strategies in addition to the LDP and strategic planning policies
- Provide more extensive plans to drive forward the city’s economic development beyond the current heavy focus on both the city centre and the Bay
- Focus greater efforts on reducing inequalities between the southern arc and the rest of the city
- Deliver improved bus services to those parts of the city that are currently less-well served
- Provide clear detail on what the administration intends with regards to road user charging so full information is provided to councillors before they are asked to vote on any such proposals”
