

Year 1 Implementation Plan

Action	What we'll do - Year 1
Active Environments	
<p>Cardiff's built and natural environment supports and enables our population to be physically active. We value, invest in and promote our green and blue spaces, ensuring equitable access to all, and that communities are connected to the space around them. We support and prioritise healthy travel (walking, cycling, other forms of mobility involving the use of wheels including wheelchairs, scooters and skates, and the use of public transport) including discouraging the use of the car for short journeys. Collectively we actively look for policies and environmental 'nudges' that can encourage physical activity in everyday life."</p>	<p>Undertake an audit of community and private facilities that can be utilised for physical activity, to inform future planning and developments of facilities.</p>
	<p>Pilot a place based approach in 1-2 of our deprived communities to understand the most important issues and opportunities around being active, and work collaboratively to increase physical activity levels. (21st Century Schools, Social prescribing, physical environment, active travel infrastructure, community sports clubs and voluntary workforce)</p>
	<p>Audit baseline status against the recommended actions within the Creating Healthier Spaces and Places for our Present and Future Generations document http://www.wales.nhs.uk/sitesplus/documents/888/Creating%20healthier%20places%20spaces.pdf</p>
Active People	
<p>People in Cardiff have access to and are supported to make use of a wide range of inclusive physical activity opportunities, whatever their background or location. Opportunities and programmes are low cost or free to allow universal access. Community events and activities bring people together to enjoy being active and support each other. People enjoy working and learning in places that support them to be active everyday."</p>	<p>Pilot a place based approach in 1-2 of our deprived communities to understand the most important issues and opportunities around being active, and work collaboratively to increase activity levels. (Build community cohesion, integration and participation through events and celebrations, targeting least active)</p>
	<p>Expand the number and range of NHS rehab and treatment services using community venues, to increase accessibility for patients and sustain their physical activity levels post discharge.</p>
Active Societies	
<p>It is normal to be regularly physically active in Cardiff – everybody is doing it! There is an activity 'buzz' in the city as people find different ways to enjoy physical activity together. We build communities around physical activity and sport and support each other, in 'real life' and online. Through communications and social media we regularly promote the value of physical activity for health, environmental and community benefits."</p>	<p>Introduce a Sport & Physical Activity Events Levy, and use the revenue to administer improvement grants aimed at increasing physical activity levels</p>
	<p>Support workplaces to design physical activity back into the working day</p>
	<p>Strengthen referrals to physical activity opportunities from primary care / justice system Pilot a place based approach in 1-2 of our deprived communities to understand the most important issues and opportunities around being active, and work collaboratively to increase activity levels. (Focusing on our volunteer workforce and local community ambassadors)</p>
